

**PERSONAL TOUCH IN
AIRCRAFT MAINTENANCE**

COMPANY PROFILE

Found in 1962, EMAIR Aviation Inc. is a leading aviation company in Turkey with years of experience on sales, service, maintenance and operation of Cessna Aircraft.

EMAIR is the only authorized sales representative of Cessna Aircraft, for the whole product line from single engine Cessnas to Citation business jets, in Turkey for more than 40 years. EMAIR has delivered more than 250 Cessna aircraft, of which around 50 of them are Citation business jets in the territory to government, military and private customers.

Increasing aircraft sales brought the need to support the fleet and EMAIR Aviation has established a maintenance facility in Ankara Esenboğa International Airport (LTAC) in 1994. EMAIR Service Center is offering maintenance and spare parts support to most Cessna Citation, Caravan, Multi Engine and Single Engine aircraft in the region along with some other GA aircraft. The Service Center located at the private hangars area (Apron 5) has been one of the first Turkish maintenance facilities to receive JAR-145 approval in 1999. In 2010 EMAIR opened the doors of its new maintenance facility offering 2000 sqm of hangar space and 800 sqm of office/shop space, which became the largest business aviation hangar in the country. The convenient location of the Ankara Esenboğa International Airport enables EMAIR to serve customers in a wide region between Eastern Europe and Middle East. Currently EMAIR Maintenance Facility is the only Cessna Authorized Service Center for Cessna single engine, multi engine, Caravan and Citation aircraft in Turkey.
